About the community

Sisu is a community providing a platform to educate, inspire and showcase aspiring women and non-binary DJs and producers.

Our vision is to create educational and inspirational spaces that enhance national and international opportunities within the music industry. We achieve this through DJ courses, a professional DJ roster, curated events, radio shows, and specialised workshops. These initiatives foster connections and provide pathways for aspiring music professionals to enter and thrive in the industry.

We are a community-led, grassroots organisation with a flexible, collaborative, and inclusive ethos. Our focus is on developing the careers of women and non-binary individuals, both as DJs and in behind-the-scenes roles within the music industry.
